

clean area

garments

alsico 
hightech

Did you know, that a high percentage of the people that work in cleanroom environments wear inadequate garments?

This results in a cleanroom with a higher risk of a fallout due to contamination. By selecting the right garments, you can reduce cost and decrease fallout time.

Let us take care of your contamination risks, so you can focus on your product.

Our Grade C/D collection has 5 fabric groups, each of them with its own characteristics.

01

lightweight fabrics

- ✓ Temperature control: to avoid heat accumulation under the coverall
- ✓ Particle filtration: body box tests show a decrease of particles in comparison to polyester-cotton undergarments
- ✓ Comfort feeling: silky touch, optimal comfort comparable to sportswear garments
